GET MAASKED

The COVID-19 global crisis has changed the way we live. Social distancing, washing hands and wearing a mask are some of the best measures we can take to avoid the spread of the virus and keep our communities safe. These are behaviors we will have to practice for a long time to come.

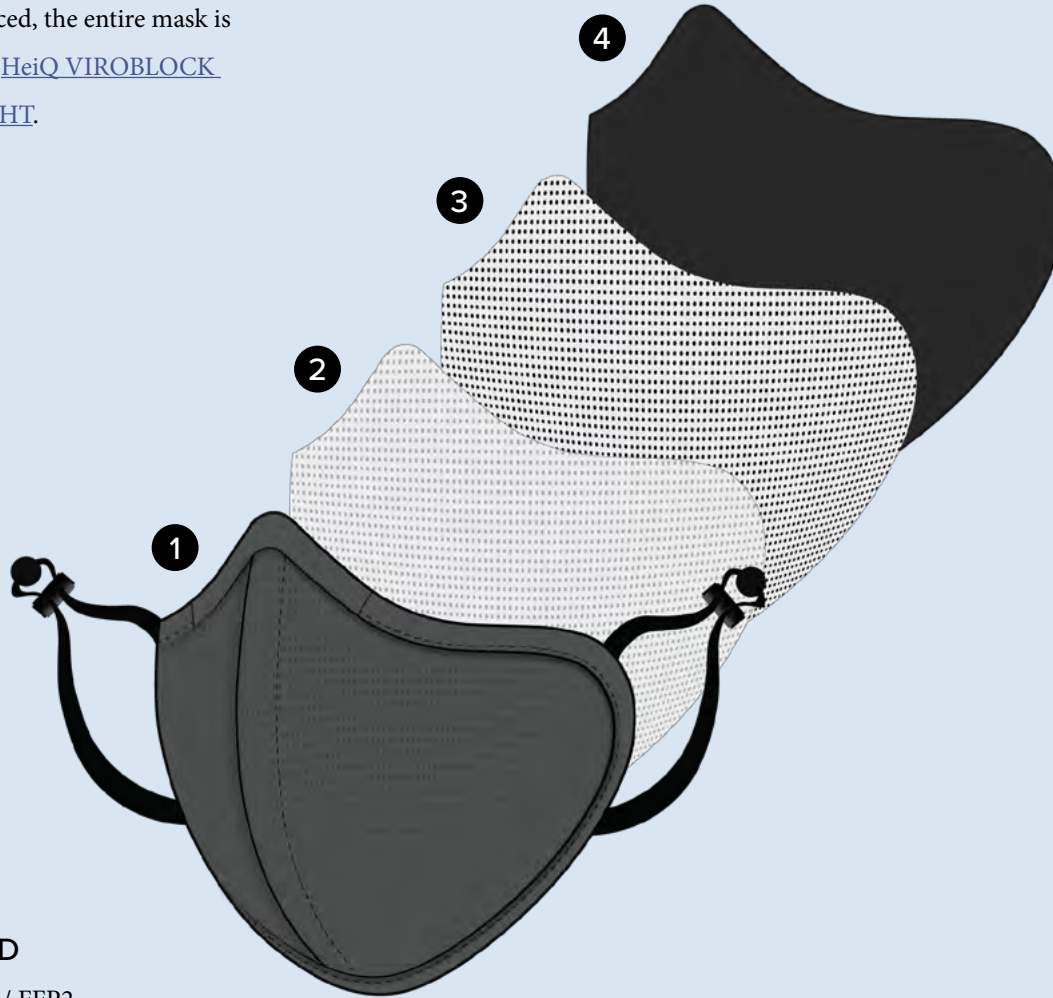

Responding to an increased demand of protective face masks, we at Shirts International have used our background in technical textiles and garment production to develop high quality, affordable and environmentally friendly masks. Our multi-layered masks are armed with innovative [Swiss technology by CHT](#), that protects finished textiles from microbes and germs, thus shielding both the wearer and those around them.

MULTI LAYERED PROTECTION

SWISS TECHNOLOGY

Once produced, the entire mask is treated with [HeiQ VIROBLOCK](#) NPJO3 by [CHT](#).

100% Polyester, Knitted fabric.

[TENCEL™](#) (Lyocell) Knitted fabric.

Lyocell is inherently antimicrobial and hence resists formation of bacteria. This keeps the mask soft and clean.

100% Polyester, Knitted fabric with **Activated Carbon** which purifies Allergens, Smoke, Benzene, Unpleasant Odors, and Volatile Organic Compounds.

100% Polyester, Knitted soft touch fabric made from [R|Elan® FeelFresh](#) Yarn with inherent Anti Microbial and Anti-Fungal properties achieved using Silver Ion technology.

Approved JISL 1902 / ISO 20743 Test and Skin-friendly Test: ISO 10993-10.

CERTIFIED

N95 / KN95 / FFP2

Standard: EN 149:2001+A1:2009

DESIGN FEATURES

Bendable Contouring Strip

A soft metallic bendable nose strip, sewn into the mask, ensures a snug fit keeping stray particles at bay.

Soft-Touch Fabric

The innermost fabric layer that comes in direct contact with the skin meets the requirements of Skin-friendly Test: ISO 10993-10.

Enviro - Friendly

The reusable mask can be machine washed upto 30 times at 60°C without losing its efficacy.

Breathable

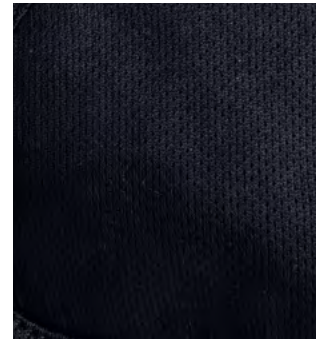

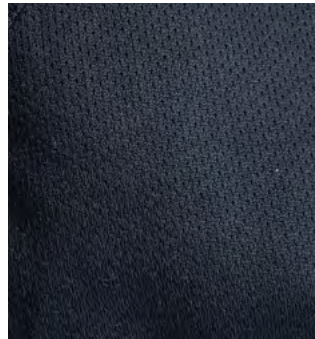

Fabrics used in the making of the mask are tested for excellent air and vapour permeability.

Adjustable Ear Loops

The woven elastic ear loops feature a barrel spring cord lock. This allows the user to adjust the tightness of the mask based on their face shape and size.
